

Empowering Global Enterprises to Achieve Digital Transformation

Joget Combines the Best of Rapid Application Development, Business Process Automation and Workflow Management.

Open Source + No-Code/Low-Code + Workflow

What is Joget DX?

Joget DX is an open source no-code/low-code application platform for faster, simpler digital transformation. It combines the best of business process automation, workflow management and rapid application development in a simple, flexible and open platform.

Visual and web-based, it empowers non-coders to instantly build and maintain apps anytime, anywhere. Joget makes it easy to empower business users, non-coders or coders to create enterprise applications for customer management, operational excellence, business process management and administration. Every organization demands easy to build and adaptable applications, and Joget enables those application delivery goals with a low total cost of ownership.

With more than 3,000 installations, 400+ enterprise customers and 12,000 community users worldwide across various industries (including finance, manufacturing, IT, and more), Joget is a proven platform for a wide spectrum of organizations ranging from Fortune 500 companies to government agencies and small businesses.

Gartner
peerinsights™

"I Dreamed Of It And Joget Did It!"

5.0 ★★★★★

"It was the only one where I could download, install and create my first app in just 2 hours directly on my Workstation (for testing purpose)!! Just amazing!! Without typing any piece of code I was able to create an app to automate a process which was done previously by email and excel file!!"

"Very Easy And Quick Implementation."

5.0 ★★★★★

"We used the Joget product for automating the catalog management and other workflow requirement. Joget has tons of feature to spin the application in matter of hours. There is no code involved. I highly recommend for any enterprise. "

AGRICULTURE

Customer: Plantation Conglomerate

The client is a leading oil palm plantation conglomerate in Southeast Asia, and its business is diversified into other industries such as pulp & paper, real estate, financial services, agribusiness, telecommunications and mining.

Business Issue

- The Customer needed a paper-less system to manage daily oil palm estate task assignments and operations, as well as electronic recording and automated batch upload of estate and mill output data into the centralized SAP system, from de-centralized sources.

Summary

- With plantations spanning vast areas in multiple remote locations, managing the day-to-day activities of each plantation is an enormous challenge.
- Manual business processes and workflow are difficult to keep track and results in frequent delays.
- Remote locations are unable to manage and report work progress on time.
- Management experience frequent loss of important paper documents.

Workflow System for Plantation Operations

Solution Highlights

- WSPO is a workflow system build on the Joget platform to automate various core processes commonly practiced in 130 oil palm estates, and the palm oil refinery mill associated with each estate.
- WSPO receives electronic data input captured from mobile devices through the use of BLE (Bluetooth Low Energy) technology in field operations, and initiates approval processes with the party-in-charge.
- When a set of data is approved and validated against business rules, it will be scheduled for automated batch upload from the decentralized architecture, into a centralized SAP backend system in HQ.
- The system is designed to support a loosely coupled architecture as part of achieving high availability objectives across an architecture that involves more than a hundred decentralized systems.
- The Joget platform helped the multinational to optimize data integrity, lower operational cost, minimize revenue loss and improve process efficiency.

Joget Ecosystem

- **Joget Cloud**
Get started and start building your own enterprise app with Joget DX now.
- **Joget DX Video Tutorials**
Watch the quick overview and learn from the video tutorials.
- **Joget DX Knowledge Base**
Grow your Joget knowledge with the tutorials, samples apps, and other documentation reference.
- **Community Q&A**
