

Empowering Global Enterprises to Achieve Digital Transformation

Joget Combines the Best of Rapid Application Development, Business Process Automation and Workflow Management.

Open Source + No-Code/Low-Code + Workflow

What is Joget DX?

Joget DX is an open source no-code/low-code application platform for faster, simpler digital transformation. It combines the best of business process automation, workflow management and rapid application development in a simple, flexible and open platform.

Visual and web-based, it empowers non-coders to instantly build and maintain apps anytime, anywhere. Joget makes it easy to empower business users, non-coders or coders to create enterprise applications for customer management, operational excellence, business process management and administration. Every organization demands easy to build and adaptable applications, and Joget enables those application delivery goals with a low total cost of ownership.

With more than 3,000 installations, 400+ enterprise customers and 12,000 community users worldwide across various industries (including finance, manufacturing, IT, and more), Joget is a proven platform for a wide spectrum of organizations ranging from Fortune 500 companies to government agencies and small businesses.

Gartner
peerinsights™

"I Dreamed Of It And Joget Did It!"

5.0 ★★★★★

"It was the only one where I could download, install and create my first app in just 2 hours directly on my Workstation (for testing purpose)!! Just amazing!! Without typing any piece of code I was able to create an app to automate a process which was done previously by email and excel file!!"

"Very Easy And Quick Implementation."

5.0 ★★★★★

"We used the Joget product for automating the catalog management and other workflow requirement. Joget has tons of feature to spin the application in matter of hours. There is no code involved. I highly recommend for any enterprise. "

Customer: Mining Company, Oman

A mining company with a long history of oil and gas exploration and production in the Middle East. It is a major investor in Oman and one of the world's pioneers in tight gas production, bringing technology and experience to develop one of the Middle East's largest unconventional gas resources.

With operations in Europe, North and South America, Australasia, Asia and Africa, BP deliver energy solutions across the world.

Business Issue

- Needed a system to keep track of the logistics and deployment of a large number of people to and from multiple project sites.

Summary

- People logistics and deployment to project sites is a big challenge to manage manually.
- Tracking and headcount is vital to ensure the safety of the workers and crews.
- Logistics information and reports should be readily available in real time.

Peopletracker System

Solution Highlights

- The Peopletracker System is an integrated web-based solution used to manage the logistics and deployment of a large number of people, to and from the project sites.
- The system was designed to be highly secure and it is compliant with stringent vulnerability assessment benchmarks. It contains an electronic Journey Management System (JMS) and is capable of performing the following:
 - Track the movements between work-site and base.
 - Capture travel authorization electronically.
 - Systematically ensure that the personal details of all personnel and those of their dependents are captured in the "Warden System".
- The system is required to create headless processes in Joget and integrate those with their existing application frontend via APIs.

Joget Ecosystem
